

Green Tea Phytosome Complex

Quest Green Tea with Phytosome™ 140 mg is a unique, high-quality formula designed to protect against cardiovascular disease. A potent antioxidant, green tea has been shown to lower overall cholesterol and raise HDL (good) cholesterol and protect against atherosclerosis. Green tea may also help reduce blood pressure, and it can inhibit the inflammatory processes that can lead to cardiovascular disease.

PRODUCT CODE: 338670

HEALTH SOLUTIONS:

RECOMMENDED USE	DOSAGE FORM	RECOMMENDATIONS
A source of antioxidants for the maintenance of good health.	Capsules	Adults take 2 capsules twice daily with meals.

DESCRIPTION:

Each easy-to-swallow capsule of Quest Green Tea with Phytosome™ 140 mg contains 100 mg of Green Tea Phytosome™ complex, 33 mg of Greenselct™ Tea Leaf Extract, 67 mg of phosphatidylcholine, and 40 mg of green tea (*Camellia sinensis*) leaf extract. This product contains no artificial preservatives, colours, or flavours, or corn, dairy, egg, gluten, shellfish, sulfites or animal derivatives.

Recommended Daily Allowance: N/A

Food Sources: N/A

Causes of Deficiency: Diet deficient in antioxidants from fruit and vegetables.

Symptoms of Deficiency: Atherosclerosis, cardiovascular disease.

Complementary Nutrients: A healthy diet.

HOW IT WORKS:

The active ingredients in green tea extract, Greenselct™, are polyphenols in the form of catechins and epigallocatechin gallate (EGCG). EGCG functions as an antioxidant, meaning it scavenges and neutralizes free radical molecules that damage healthy cells. The patented Phytosome™ technology is a process that binds green tea polyphenols with phosphatidylcholine, an emulsifying compound derived from soy, for enhanced bioavailability. Green tea extract supports heart health by preventing the oxidation of LDL cholesterol, which can lead to atherosclerosis.

DID YOU KNOW...

Green tea has been used medicinally in India and China for 5,000 years.

Green Tea Phytosome Complex

RESEARCH:

A study, reported in 2006 in the Journal of the American Medical Association, was initiated in an attempt to study a possible association between the consumption of green tea and reduced mortality in Japan. The investigators enrolled over 40,000 people ages 40 to 79 in this study and followed all participants for up to 11 years. During that time, participants who consumed 5 or more cups of tea per day had a 16% lower risk of all-cause mortality, and a 26% lower risk of cardiovascular disease than participants who consumed less than 1 cup of tea per day. Several potential mechanisms have been postulated for the beneficial effects mediated by green tea, including its antioxidant properties and its favorable influence on hypertension and LDL cholesterol.

SIDE EFFECTS:

No side effects expected at recommended dosage.

INTERACTIONS AND SAFETY CONSIDERATIONS:

Consult your health care practitioner before use if you are taking any medications.

OTHER CONSIDERATIONS:

Consult a health care practitioner if you are pregnant or breastfeeding. Keep out of reach of children.
